Re: B.P. Minerals  
Barney's Canyon Project  
Specification Modification

Dear Mr. Ramsey:

Pursuant to our conversation, the specification requiring one field density test per 500 cubic yards for the previous backfill (leak detection media) is hereby waived. The waiver is granted for the following reasons:

1. The material should be as loose as possible and yet stable enough to create the maximum permeability rate.
2. The inability of field quality assurance personnel to conduct a density test due to the gravelly nature of the material.

If there are any other questions, please let us know.

Sincerely,

Utah Water Pollution Control Committee

  
Don A. Ostler, P.E.  
Executive Secretary
